

**The complete ERP professional services formula:**

- Expertise in leading ERP solutions, such as: Oracle (E-Business Suite) including PeopleSoft (Enterprise), J.D. Edwards (EnterpriseOne, EnterpriseWorld) and Lawson Software.
- Industry-specific knowledge, to assure effective deployments
- IT personnel recruitment to match your requirements
- A strong track record of success around the world

# Professional Application Services

## *Combining ERP Know-How with Vertical Industry Expertise*

You look to ERP technology to better integrate your business processes, boost productivity, reduce costs, and leverage the potential of the “connected economy.” While many vendors offer product-specific ERP expertise, and can provide implementation services, you need much more. The deployment of your business-critical applications must take into account the unique challenges of your specific industry. For instance, the application and impact of ERP solutions within a manufacturing environment can differ dramatically from those within financial services market. A lack of understanding of industry-specific requirements can lead to problems that will often surface only after you have already invested in an ERP implementation. Given the importance of ERP to your strategic business objectives, it’s essential that your partner not only has technical capabilities, but can also offer essential insight and experience relative to your industry.

### **An ERP partner that understands your unique business environment**

With our Professional Application Services, Infocrossing’s Enterprise Application Services will address your ERP projects from top to bottom. We’re a full-service ERP service integration, software development, and IT/Sales recruitment company that does much more than just implement. We bring a strategic thought process to ERP applications – an approach designed to give our clients a competitive advantage through business optimization and/or business process re-engineering. At the heart of our advantage is industry-specific experience that gives us the “situational fluency” required to ensure that your ERP applications give you a competitive edge within your industry. This focused approach to Professional Application Services is in keeping with Infocrossing’s highly effective “Selective Outsourcing” business model.

Our team is skilled in software implementation (including supply chain and business optimization software) and systems/business process engineering, and has strong technical expertise and specific industry experience including:

- Energy and Chemical
- Agriculture and Food Processing
- Entertainment
- Life Sciences
- Consumer Products
- Real Estate, Engineering and Construction
- Financial Services
- Manufacturing

We do it with our extensive, worldwide ERP experience and our unique methodology that results in better product, more rapidly deployed, with more complete knowledge transfer and a much lower total project cost.

# Professional Application Services

## **We will help you fill your talent gap**

In addition to our world-class implementation services, our Recruitment Services Group can find the ideal candidates for your IT hiring needs. Using our thorough, multi-step recruitment process, we can ensure that you'll get candidates that are fully screened and have the specific industry experience, technical skills, personal attributes, and leadership abilities that are ideally matched to your company and the position – guaranteed.

## **Market-leading ERP expertise – which you can trust**

Infocrossing's Enterprise Application Services offers the infrastructure and expertise to manage the market's leading ERP applications – Oracle (E-Business Suite) including PeopleSoft (Enterprise), J.D. Edwards (EnterpriseOne, EnterpriseWorld) and Lawson Software.

We offer multinational, multi-site implementation experience, with over 130 clients at over 200 sites around the globe, including North, Latin and South America; Western and Eastern Europe; the Pacific Rim; and the Middle East and Africa. So deep is our network of professionals and partners that we know where to find the right experts for just about any project. We will help you move from planning to deployment with a set of best practices, repeatable processes and resources that go beyond the expected. We provide a view into possible pitfalls and opportunities, and combine extensive product knowledge with deep industry expertise to allow your internal teams to focus on their own areas of responsibility.

### **Infocrossing: Defining Selective Outsourcing**

For IT-driven companies who lack the resources to cost-effectively maintain all of their IT operations, Infocrossing's Selective Outsourcing Suite is an objective-driven method that helps them target and outsource specific, well-defined IT functions, while keeping other business-critical operations under internal control. Unlike limited "boutique" services or "all-or-nothing" outsourcing services, our Selective Outsourcing Solutions empower customers to more precisely align their IT infrastructure with strategic business objectives – to reduce costs and improve competitive flexibility.
